1 For the purposes of this rubric, evidence of analytic writing includes explanation through **comparison (similarities and differences)** , **cause and effect connections**, **sourcing (HAPPY)**, and **corroboration (evidence that confirms or supports your issue/poblem)**.

2 The term create as used by Anderson/Krathwohl, et al. in their 2001 revision of Bloom's Taxonomy of Educational Objectives refers to the highest level of the cognitive domain. This usage of create is similar to Bloom's use of the term synthesis. Creating implies an insightful reorganization of information into a new pattern or whole. While a Level 5 paper will contain analysis and/or evaluation of information, a very strong paper may also include examples of creating information as defined by Anderson and Krathwohl.

Note: If all aspects of the task are thoroughly developed evenly and in depth for one resource and the response meets most of the other Level 5 criteria, the overall response may be a Level 3 paper.
